DETAILED ACTION

This is a response to the Applicants' amendment submitted on April 14th, 2005. In virtue of this amendment, claim 2 is canceled; and thus, claims 1 and 3-9 are now presented in the instant application.

Allowable Subject Matter

1. Claims 1 and 3-9 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or fairly suggest:

- A circuit to drive a light source that includes a discharge tube wherein the control device switches the light source to the lighting mode set by the lighting mode setting unit after the halogen cycle of the discharge tube is stabilized, the switching between the plurality of lighting modes being performed for one or more seconds, in combination with the remaining claimed limitations as called for in independent claim 1 (claims 3-6 are allowed since they are dependent on claim 1);
- A projector to modulate light beams emitted from a light source according to image information to form optical images and to enlarge and protect the optical images, wherein the control device switches the light source to the lighting mode set by the lighting mode setting unit after the halogen cycle of the discharge tube is stabilized, the switching between the plurality of lighting modes being performed for one or more seconds, in combination with the remaining claimed limitations as called for in independent claim 7;

- A method of controlling the lighting of a light source comprising switching the light source to the lighting mode set in the setting of the lighting mode after the halogen cycle of the discharge tube is stabilized, the switching between the plurality of lighting modes being performed for one or more seconds, in combination with the remaining claimed limitations as called for in independent claim 8; and
- A computer readable program for executing a method of controlling the lighting of a light source comprising a program for switching the light source to the lighting mode set in the setting of the lighting mode after the halogen cycle of the discharge tube is stabilized, the switching between the plurality of lighting modes being performed for one or more seconds, in combination with the remaining claimed limitations as called for in independent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of relevant prior art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art Kito (U.S. Patent No. 6,650,069) discloses a discharge lamp lighting device.
